

Instructions

 1. There are 65 Question in the test which you to finish 65 minutes

 2. you can share question by clicking on 

 3. you can provide feedback/suggestion by clicking on 

34:44

Question 1/65

Your company has just started using the resources on the AWS Cloud. They want to get an idea of the costs being incurred so far for the resources being used. How can this be achieved?

- A) By going to the Amazon EC2 dashboard. Here you can see the costs of the running EC2 resources
- B) By using the AWS Cost and Usage reports Explorer. Here you can see the running and forecast costs
- C) By using the AWS Trusted Advisor dashboard. This dashboard will give you all the costs
- D) By seeing the AWS Cloud Trail logs

Correct Answer:

B) By using the AWS Cost and Usage reports Explorer. Here you can see the running and forecast costs

Your Answer:

B) By using the AWS Cost and Usage reports Explorer. Here you can see the running and forecast costs

Status:

Correct

Question 2/65

An application running on EC2 instances processes sensitive information stored on Amazon S3. The information is accessed over the Internet. The security team is concerned that the Internet connectivity to Amazon S3 is a security risk. Which solution will resolve the security concern?

- A) Access the data through an Internet Gateway
- B) Access the data through a VPN connection
- C) Access the data through a NAT Gateway
- D) Access the data through a VPC endpoint for Amazon S3

Correct Answer:

D) Access the data through a VPC endpoint for Amazon S3

Your Answer:

C) Access the data through a NAT Gateway

Status:

Incorrect

Question 3/65

A Solutions Architect is designing an online shopping application running in a VPC on EC2 instances behind an ELB Application Load Balancer. The instances run in an Auto Scaling group across multiple Availability Zones. The application tier must read and write data to a customer-managed database cluster. There should be no access to the database from the Internet, but the cluster must be able to obtain software patches from the Internet. Which VPC design meets these requirements?

- A) Public subnets for both the application tier and the database cluster
- B) Public subnets for the application tier, and private subnets for the database cluster
- C) Public subnets for the application tier and NAT Gateway, and private subnets for the database cluster
- D) Public subnets for the application tier, and private subnets for the database cluster and NAT Gateway

D) Public subnets for the application tier, and private subnets for the database cluster and NAT Gateway

Correct Answer:

C) Public subnets for the application tier and NAT Gateway, and private subnets for the database cluster

Your Answer:

C) Public subnets for the application tier and NAT Gateway, and private subnets for the database cluster

Status: Correct

Question 4/65

Which of the following services are included at no additional cost with the use of the AWS platform? (Choose two)

- A) Cloudformation
- B) Elastic Load Balancing
- C) Elastic Compute Cloud
- D) Auto Scaling

Correct Answer:

A) Cloudformation  
D) Auto Scaling

Your Answer:

A) Cloudformation  
D) Auto Scaling

Status: Correct

Question 5/65

Select the correct option for AWS Service/feature and its scope.

- A) S3 Bucket - Region | EBS - AZ | Subnet - AZ | AMI – Region
- B) S3 Bucket - AZ | EBS - Region | Subnet - VPC | AMI - Region
- C) S3 Bucket - Region | EBS - Region | Subnet - AZ | AMI - Region
- D) S3 Bucket - Global | EBS - AZ | Subnet - VPC | AMI - AZ

Correct Answer:

A) S3 Bucket - Region | EBS - AZ | Subnet - AZ | AMI – Region

Your Answer:

A) S3 Bucket - Region | EBS - AZ | Subnet - AZ | AMI – Region

Status: Correct

Question 6/65

Select the memory-optimized instance families.

- A) X, R
- B) M, R
- C) C, X, M, R
- D) C, M, R

Correct Answer:  
A) X, R

Your Answer:  
A) X, R

Status: Correct

Question 7/65

An organization deployed its static website on Amazon S3. Now, the Developer has a requirement to serve dynamic content using a serverless solution. Which combination of services should be used to implement a serverless application for the dynamic content? Select 2 answers from the options given below.

- A) API Gateway
- B) EC2
- C) ECS
- D) Lambda

Correct Answer:  
A) API Gateway  
D) Lambda

Your Answer:  
C) ECS  
D) Lambda

Status: Incorrect

Question 8/65

Which compute service is available at Cloudfront’s edge locations?

- A) ECS
- B) EC2
- C) Lambda
- D) Lightsail

Correct Answer:  
C) Lambda

Your Answer:  
A) ECS

Status: Incorrect

Question 9/65

Your company is planning to host resources in the AWS Cloud. They want to use services that can be used to decouple resources hosted on the cloud. Which of the following services can help fulfill this requirement?

- A) AWS EBS Volumes
- B) AWS EBS Snapshots
- C) AWS Glacier

D) AWS SQS

Correct Answer:  
D) AWS SQS

Your Answer:  
D) AWS SQS

Status: Correct

Question 10/65

Your company is planning on moving to the AWS Cloud. Once the move to the Cloud is complete, they want to ensure that the right security settings are put in place. Which of the below tools can assist with Security compliance. Choose 2 answers from the options given below.

- A) AWS Inspector
- B) AWS Trusted Advisor
- C) AWS Support
- D) AWS Kinesis

Correct Answer:  
A) AWS Inspector  
B) AWS Trusted Advisor

Your Answer:  
A) AWS Inspector  
B) AWS Trusted Advisor

Status: Correct

Question 11/65

You’ve been asked to migrate a static website onto AWS. You have been told that the solution should be cost-effective. Which of the following solutions would you consider?

- A) Create an EC2 instance and deploy a website
- B) Create a website using S3 static website hosting
- C) Create an Elastic Beanstalk environment and deploy the website
- D) Create an Opsworks stack and deploy the website

Correct Answer:  
B) Create a website using S3 static website hosting

Your Answer:  
B) Create a website using S3 static website hosting

Status: Correct

Question 12/65

A company is developing a highly available web application using stateless web servers. Which services are suitable for storing session state data? (Select two)

- A) CloudWatch
- B) Amazon S3

- B) DynamoDB
- C) Elastic Load Balancing
- D) ElastiCache

Correct Answer:  
B) DynamoDB  
D) ElastiCache

Your Answer:  
A) CloudWatch  
B) DynamoDB

Status: Incorrect

Question 13/65

A Solutions Architect is designing a critical business application with a relational database that runs on an EC2 instance. It requires a single EBS volume that can support up to 16,000 IOPS. Which Amazon EBS volume type can meet the performance requirements of this application?

- A) EBS Provisioned IOPS SSD
- B) EBS Throughput Optimized HDD
- C) EBS General Purpose SSD
- D) EBS Cold HDD

Correct Answer:  
A) EBS Provisioned IOPS SSD

Your Answer:  
A) EBS Provisioned IOPS SSD

Status: Correct

Question 14/65

A web application allows customers to upload orders to an S3 bucket. The resulting Amazon S3 events trigger a Lambda function that inserts a message to an SQS queue. A single EC2 instance reads messages from the queue, processes them, and stores them in a DynamoDB table partitioned by a unique order ID. Next month traffic is expected to increase by a factor of 10 and a Solutions Architect is reviewing the architecture for possible scaling problems. Which component is most likely to need re-architecting to be able to scale to accommodate the new traffic?

- A) Lambda function
- B) SQS queue
- C) EC2 instance
- D) DynamoDB table

Correct Answer:  
C) EC2 instance

Your Answer:  
C) EC2 instance

Status: Correct

Question 15/65

A Solutions Architect is designing an online shopping application running in a VPC on EC2 instances behind an ELB Application Load Balancer. The instances run in an Auto Scaling group across multiple Availability Zones. The application tier must read and write data to a customer-managed database cluster. There should be no access to the database from the Internet, but the cluster must be able to obtain software patches from the Internet. Which VPC design meets these requirements?

- A) Public subnets for both the application tier and the database cluster
- B) Public subnets for the application tier, and private subnets for the database cluster
- C) Public subnets for the application tier and NAT Gateway, and private subnets for the database cluster
- D) Public subnets for the application tier, and private subnets for the database cluster and NAT Gateway

Correct Answer:

- C) Public subnets for the application tier and NAT Gateway, and private subnets for the database cluster

Your Answer:

- C) Public subnets for the application tier and NAT Gateway, and private subnets for the database cluster

Status: Correct

### Question 16/65

For which of the following workloads should a Solutions Architect consider using Elastic Beanstalk? (Choose two)

- A) Web app using RDS
- B) Enterprise Data warehouse
- C) Long running worker process
- D) Static website

Correct Answer:

- A) Web app using RDS
- C) Long running worker process

Your Answer:

- A) Web app using RDS
- C) Long running worker process

Status: Correct

### Question 17/65

An application with a 150 GB relational database runs on an EC2 Instance. While the application is used infrequently with small peaks in the morning and evening, what is the most cost-effective storage type among the options below?

- A) Io1
- B) ST1
- C) GP2
- D) EFS

Correct Answer:

- C) GP2

Your Answer:

- C) GP2

Status: Correct

## Question 18/65

Which AWS service provides the ability to detect inadvertent data leaks of personally identifiable information (PII) and user credential data?

- A) Amazon GuardDuty
- B) Amazon Inspector
- C) Amazon Macie
- D) AWS Shield

Correct Answer:

C) Amazon Macie

Your Answer:

C) Amazon Macie

Status: Correct

## Question 19/65

What credential components are required to gain programmatic access to an AWS account? (Choose two)

- A) A primary key
- B) An access key ID
- C) Secret access key
- D) A user ID

Correct Answer:

- B) An access key ID
- C) Secret access key

Your Answer:

- B) An access key ID
- C) Secret access key

Status: Correct

## Question 20/65

Which AWS hybrid storage service enables a user's on-premises applications to seamlessly use AWS Cloud storage?

- A) AWS Backup
- B) Amazon Connect
- C) AWS Direct Connect
- D) AWS Storage Gateway

Correct Answer:

D) AWS Storage Gateway

Your Answer:

D) AWS Storage Gateway

Status: Correct

## Question 21/65

Which AWS service enables users to create copies of resources across AWS Regions?

- A) Amazon ElastiCache
- B) AWS CloudFormation
- C) AWS CloudTrail
- D) AWS Systems Manager

Correct Answer:

- B) AWS CloudFormation

Your Answer:

- B) AWS CloudFormation

Status: Correct

## Question 22/65

AWS Trusted Advisor provides recommendations on which of the following? (Choose two)

- A) Cost optimization
- B) Serverless architecture
- C) Performance
- D) Scalability

Correct Answer:

- C) Performance
- D) Scalability

Your Answer:

- C) Performance
- D) Scalability

Status: Correct

## Question 23/65

Which of the following AWS services is serverless? (Choose two)

- A) AWS Lambda
- B) Amazon Elasticsearch Service
- C) Amazon DynamoDB
- D) Amazon Redshift

Correct Answer:

- A) AWS Lambda
- C) Amazon DynamoDB

Your Answer:

- A) AWS Lambda
- C) Amazon DynamoDB

Status: Correct

## Question 24/65

What AWS benefit refers to a customer's ability to deploy applications that scale up and down to meet variable demand?

- A) Elasticity
- B) Agility
- C) Security
- D) Scalability

Correct Answer:

D) Scalability

Your Answer:

D) Scalability

Status: Correct

## Question 25/65

Which of the following allows AWS users to manage cost allocations for billing?

- A) Tagging resources
- B) Limiting who can create resources
- C) Adding a secondary payment method
- D) Running all operations on a single AWS account

Correct Answer:

A) Tagging resources

Your Answer:

A) Tagging resources

Status: Correct

## Question 26/65

A company has a 500 TB image repository that needs to be transported to AWS for processing. Which AWS service can import this data MOST cost-effectively?

- A) AWS Snowball
- B) AWS Direct Connect
- C) AWS VPN
- D) Amazon S3

Correct Answer:

D) Amazon S3

Your Answer:

A) AWS Snowball

Status: Incorrect

Question 27/65

What does fault tolerance refer to?

- A) The ability of an application to accommodate growth without changing design
- B) How well and how quickly an application’s environment can have lost data restored
- C) How secure your application is
- D) The built-in redundancy of an application’s components

Correct Answer:  
B) How well and how quickly an application’s environment can have lost data restored

Your Answer:  
B) How well and how quickly an application’s environment can have lost data restored

Status: Correct

Question 28/65

A company operating in the AWS Cloud requires separate invoices for specific environments, such as development, testing, and production. How can this be achieved?

- A) Use multiple AWS accounts
- B) Use resource tagging
- C) Use multiple VPCs
- D) Use Cost Explorer

Correct Answer:  
B) Use resource tagging

Your Answer:  
B) Use resource tagging

Status: Correct

Question 29/65

Which AWS service can be used to track unauthorized API calls?

- A) AWS Config
- B) AWS CloudTrail
- C) AWS Trusted Advisor
- D) Amazon Inspector

Correct Answer:  
B) AWS CloudTrail

Your Answer:  
B) AWS CloudTrail

Status: Correct

Question 30/65

Which components are required to build a successful site-to-site VPN connection on AWS? (Choose two)

- A) Internet gateway
- B) NAT gateway
- C) Customer gateway
- D) Transit gateway

Correct Answer:

- C) Customer gateway
- D) Transit gateway

Your Answer:

- A) Internet gateway
- C) Customer gateway

Status: Incorrect

Question 31/65

Performing operations as code is a design principle that supports which pillar of the AWS Well-Architected Framework?

- A) Performance efficiency
- B) Operational excellence
- C) Reliability
- D) Security

Correct Answer:

- B) Operational excellence

Your Answer:

- B) Operational excellence

Status: Correct

Question 32/65

The AWS Total Cost of Ownership (TCO) Calculator is used to\_\_\_\_\_.

- A) Receive reports that break down AWS Cloud compute costs by duration, resource, or tags
- B) Estimate savings when comparing the AWS Cloud to an on-premises environment
- C) Estimate a monthly bill for the AWS Cloud resources that will be used
- D) Enable billing alerts to monitor actual AWS costs compared to estimated costs

Correct Answer:

- B) Estimate savings when comparing the AWS Cloud to an on-premises environment

Your Answer:

- B) Estimate savings when comparing the AWS Cloud to an on-premises environment

Status: Correct

Question 33/65

A company wants to try a third-party e-commerce solution before deciding to use it long-term. Which AWS service or tool will support this effort?

- A) AWS Marketplace
- B) AWS Partner Network (APN
- C) AWS Managed Services
- D) AWS Service Catalog

Correct Answer:  
A) AWS Marketplace

Your Answer:  
A) AWS Marketplace

Status: Correct

Question 34/65

Which AWS service is a managed NoSQL database?

- A) Amazon Redshift
- B) Amazon DynamoDB
- C) Amazon Aurora
- D) Amazon RDS for MariaDB

Correct Answer:  
B) Amazon DynamoDB

Your Answer:  
B) Amazon DynamoDB

Status: Correct

Question 35/65

Which actions represent best practices for using AWS IAM? (Choose two)

- A) Configure a strong password policy
- B) Share the security credentials among users of AWS accounts who are in the same Region
- C) Use access keys to log in to the AWS Management Console
- D) Rotate access keys on a regular basis

Correct Answer:  
A) Configure a strong password policy  
D) Rotate access keys on a regular basis

Your Answer:  
A) Configure a strong password policy  
D) Rotate access keys on a regular basis

Status: Correct

Question 36/65

A company wants to use an AWS service to monitor the health of application endpoints, with the ability to route traffic to healthy regional endpoints to improve application availability. Which service will support these requirements?

- A) Amazon Inspector
- B) Amazon CloudWatch
- C) AWS Global Accelerator
- D) Amazon CloudFront

Correct Answer:  
C) AWS Global Accelerator

Your Answer:  
C) AWS Global Accelerator

Status: Correct

Question 37/65

According to the AWS Well-Architected Framework, what change management steps should be taken to achieve reliability in the AWS Cloud? (Choose two)

- A) Use AWS Config to generate an inventory of AWS resources
- B) Use service limits to prevent users from creating or making changes to AWS resources
- C) Use AWS CloudTrail to record AWS API calls into an auditable log file
- D) Use AWS Certificate Manager to whitelist approved AWS resources and services

Correct Answer:  
A) Use AWS Config to generate an inventory of AWS resources  
C) Use AWS CloudTrail to record AWS API calls into an auditable log file

Your Answer:  
C) Use AWS CloudTrail to record AWS API calls into an auditable log file  
D) Use AWS Certificate Manager to whitelist approved AWS resources and services

Status: Incorrect

Question 38/65

Which service can be used to monitor and receive alerts for AWS account root user AWS Management Console sign-in events?

- A) Amazon CloudWatch
- B) AWS Config
- C) AWS Trusted Advisor
- D) AWS IAM

Correct Answer:  
A) Amazon CloudWatch

Your Answer:  
A) Amazon CloudWatch

Status: Correct

Question 39/65

Which design principle should be considered when architecting in the AWS Cloud?

- A) Think of servers as non-disposable resources
- B) Use synchronous integration of services
- C) Design loosely coupled components
- D) Implement the least permissive rules for security groups

Correct Answer:  
C) Design loosely coupled components

Your Answer:  
C) Design loosely coupled components

Status: Correct

Question 40/65

Which AWS services can be used to move data from on-premises data centers to AWS? (Choose two)

- A) AWS Snowball
- B) AWS LAMBDA
- C) AWS ElastiCache
- D) AWS Database Migration Service (AWS DMS)

Correct Answer:  
A) AWS Snowball  
D) AWS Database Migration Service (AWS DMS)

Your Answer:  
D) AWS Database Migration Service (AWS DMS)

Status: Incorrect

Question 41/65

Each department within a company has its independent AWS account and its payment method. New company leadership wants to centralize departmental governance and consolidate payments. How can this be achieved using AWS services or features?

- A) Forward monthly invoices for each account. Then create IAM roles to allow cross-account access.
- B) Create a new AWS account. Then configure AWS Organizations and invite all existing accounts to join.
- C) Configure AWS Organizations in each of the existing accounts. Then link all accounts together.
- D) Use Cost Explorer to combine costs from all accounts. Then replicate IAM policies across accounts.

Correct Answer:  
B) Create a new AWS account. Then configure AWS Organizations and invite all existing accounts to join.

Your Answer:  
B) Create a new AWS account. Then configure AWS Organizations and invite all existing accounts to join.

Status: Correct

Question 42/65

Amazon Route 53 enables users to\_\_\_\_\_.

- A) Encrypt data in transit

- B) Register DNS domain names
- C) Generate and manage SSL certificates
- D) Establish a dedicated network connection to AWS

Correct Answer:  
B) Register DNS domain names

Your Answer:  
B) Register DNS domain names

Status: Correct

Question 43/65

Which AWS service will help users determine if an application running on an Amazon EC2 instance has sufficient CPU capacity?

- A) Amazon CloudWatch
- B) AWS Config
- C) AWS CloudTrail
- D) Amazon Inspector

Correct Answer:  
A) Amazon CloudWatch

Your Answer:  
D) Amazon Inspector

Status: Incorrect

Question 44/65

Why is it beneficial to use Elastic Load Balancers with applications?

- A) They allow for the conversion from Application Load Balancers to Classic Load Balancers
- B) They are capable of handling constant changes in network traffic patterns
- C) They automatically adjust capacity
- D) They are provided at no charge to users

Correct Answer:  
B) They are capable of handling constant changes in network traffic patterns

Your Answer:  
C) They automatically adjust capacity

Status: Incorrect

Question 45/65

Which AWS service is used to automate configuration management using Chef and Puppet?

- A) AWS Config
- B) AWS OpsWorks
- C) AWS CloudFormation
- D) AWS Systems Manager

Q) AWS Systems Manager

Correct Answer:  
B) AWS OpsWorks

Your Answer:  
B) AWS OpsWorks

Status: Correct

Question 46/65

Which AWS services can be used to provide network connectivity between an on-premises network and a VPC? (Choose two)

- A) Amazon Route 53
- B) AWS Direct Connect
- C) AWS Data Pipeline
- D) AWS VPN

Correct Answer:  
B) AWS Direct Connect  
D) AWS VPN

Your Answer:  
B) AWS Direct Connect  
D) AWS VPN

Status: Correct

Question 47/65

A company is planning to migrate from on-premises to the AWS Cloud. Which AWS tool or service provides detailed reports on estimated cost savings after migration?

- A) AWS Total Cost of Ownership (TCO)
- B) Cost Explorer
- C) AWS Migration Hub
- D) AWS Budgets

Correct Answer:  
A) AWS Total Cost of Ownership (TCO)

Your Answer:  
A) AWS Total Cost of Ownership (TCO)

Status: Correct

Question 48/65

Which Amazon VPC feature enables users to capture information about the IP traffic that reaches Amazon EC2 instances?

- A) Security groups
- B) Elastic network interfaces
- C) Network ACLs
- D) VPC Flow Logs

Correct Answer:  
D) VPC Flow Logs

Your Answer:  
D) VPC Flow Logs

Status: Correct

Question 49/65

Which AWS service can be used to automatically scale an application up and down without making capacity planning decisions?

- A) Amazon AutoScaling
- B) Amazon Redshift
- C) AWS CloudTrail
- D) AWS Lambda

Correct Answer:  
D) AWS Lambda

Your Answer:  
D) AWS Lambda

Status: Correct

Question 50/65

Which AWS service makes it easy to create and manage AWS users and groups, and provides them with secure access to AWS resources at no charge?

- A) AWS Direct Connect
- B) Amazon Connect
- C) AWS Identity and Access Management (IAM)
- D) AWS Firewall Manager

Correct Answer:  
C) AWS Identity and Access Management (IAM)

Your Answer:  
C) AWS Identity and Access Management (IAM)

Status: Correct

Question 51/65

What is one of the core principles to follow when designing a highly available application in the AWS Cloud?

- A) Design using a serverless architecture
- B) Assume that all components within an application can fail
- C) Design AWS Auto Scaling into every application
- D) Design all components using open-source code

Correct Answer:

Correct Answer:

- B) Assume that all components within an application can fail

Your Answer:

- B) Assume that all components within an application can fail

Status: Correct

Question 52/65

Using AWS Config to record, audit, and evaluate changes to AWS resources to enable traceability is an example of which AWS Well-Architected Framework pillar?

- A) Security
- B) Operational excellence
- C) Performance efficiency
- D) Cost optimization

Correct Answer:

- A) Security

Your Answer:

- B) Operational excellence

Status: Incorrect

Question 53/65

Which design principle is achieved by following the reliability pillar of the AWS Well-Architected Framework?

- A) Vertical scaling
- B) Manual failure recovery
- C) Testing recovery procedures
- D) Changing infrastructure manually

Correct Answer:

- C) Testing recovery procedures

Your Answer:

- C) Testing recovery procedures

Status: Correct

Question 54/65

The user is fully responsible for which action when running workloads on AWS?

- A) Patching the infrastructure components
- B) Implementing controls to route application traffic
- C) Maintaining the underlying infrastructure components
- D) None of these

Correct Answer:

- B) Implementing controls to route application traffic

Your Answer:  
B) Implementing controls to route application traffic

Status: Correct

Question 55/65

Using AWS Identity and Access Management (IAM), what can be attached to an Amazon EC2 instance to make service requests?

- A) Group
- B) Role
- C) Policy
- D) Access key

Correct Answer:  
B) Role

Your Answer:  
C) Policy

Status: Incorrect

Question 56/65

A security officer wants to enable IPsec communications to securely connect users from on-premises networks to AWS. Which AWS service or feature should the officer use?

- A) Amazon VPC
- B) AWS VPN
- C) AWS Direct Connect
- D) Amazon Connect

Correct Answer:  
B) AWS VPN

Your Answer:  
B) AWS VPN

Status: Correct

Question 57/65

A company wants to use an AWS service to monitor the health of application endpoints, with the ability to route traffic to healthy regional endpoints to improve application availability. Which service will support these requirements?

- A) Amazon Inspector
- B) Amazon CloudWatch
- C) AWS Global Accelerator
- D) Amazon CloudFront

Correct Answer:  
C) AWS Global Accelerator

Your Answer:  
C) AWS Global Accelerator

C) AWS Global Accelerator

Status: Correct

### Question 58/65

Each department within a company has its independent AWS account and its payment method. New company leadership wants to centralize departmental governance and consolidate payments. How can this be achieved using AWS services or features?

- A) Forward monthly invoices for each account. Then create IAM roles to allow cross-account access.
- B) Create a new AWS account. Then configure AWS organizations and invite all existing accounts to join.
- C) Configure AWS organizations in each of the existing accounts. Then link all accounts together.
- D) Use Cost Explorer to combine costs from all accounts. Then replicate IAM policies across accounts.

Correct Answer:

B) Create a new AWS account. Then configure AWS organizations and invite all existing accounts to join.

Your Answer:

B) Create a new AWS account. Then configure AWS organizations and invite all existing accounts to join.

Status: Correct

### Question 59/65

Which tool is best suited for combining the billing of AWS accounts that were previously independent of one another?

- A) Detailed billing report
- B) Consolidated billing
- C) AWS Cost and Usage report
- D) Cost allocation report

Correct Answer:

B) Consolidated billing

Your Answer:

B) Consolidated billing

Status: Correct

### Question 60/65

Which Amazon EC2 pricing model should be used to comply with per-core software license requirements?

- A) Dedicated Hosts
- B) On-Demand Instances
- C) Spot Instances
- D) Reserved Instances

Correct Answer:

A) Dedicated Hosts

Your Answer:

A) Dedicated Hosts

Status: Correct

Status: Correct

Question 61/65

A company wants to migrate a MySQL database to AWS but does not have the budget for Database Administrators to handle routine tasks including provisioning, patching, and performing backups. Which AWS service will support this use case?

- A) Amazon RDS
- B) Amazon DynamoDB
- C) Amazon DocumentDB
- D) Amazon ElastiCache

Correct Answer:  
A) Amazon RDS

Your Answer:  
A) Amazon RDS

Status: Correct

Question 62/65

Which AWS service can be used to automatically scale an application up and down without making capacity planning decisions?

- A) Amazon AutoScaling
- B) Amazon Redshift
- C) AWS CloudTrail
- D) AWS Lambda

Correct Answer:  
D) AWS Lambda

Your Answer:  
A) Amazon AutoScaling

Status: Incorrect

Question 63/65

What is an Availability Zone in AWS?

- A) One or more physical data centers

Test your knowledge for AWS Certified Cloud Practitioner ( AWS Cloud Practitioner )

- C) One or more edge locations based around the world
- D) A data center location with a single source of power and networking

Correct Answer:  
A) One or more physical data centers

Your Answer:  
A) One or more physical data centers

Status: Correct

Question 64/65

Which AWS service enables users to create copies of resources across AWS Regions?

- A) Amazon ElastiCache
- B) AWS CloudFormation
- C) AWS CloudTrail
- D) AWS Systems Manager

Correct Answer:  
B) AWS CloudFormation

Your Answer:  
B) AWS CloudFormation

Status: Correct

Question 65/65

Which design principle should be considered when architecting in the AWS Cloud?

- A) Think of servers as non-disposable resources
- B) Use synchronous integration of services
- C) Design loosely coupled components
- D) Implement the least permissive rules for security groups

Correct Answer:  
C) Design loosely coupled components

Your Answer:  
C) Design loosely coupled components

Status: Correct

Submit
