

Here's a quick guide to setting up your AWS Training account and launching the Cloud Practitioner Essentials digital training course.

1. Visit [www.aws.training](https://www.aws.training).
2. Click 'Create Account'
3. You'll find a page of sign in options that looks like this:

On the left, you can use your Amazon account (that you have used for shopping at Amazon.com, watching Amazon Prime, or listening to Audible books, etc.) to create a linked AWS Training account. If you don't have one of these accounts already, you can create a new one. Please note that this is *not* your AWS console account, where you may have been building or experimenting in the cloud. You don't need an AWS console account to complete training, so should not be asked to enter any credit card details at this stage.

On the right, you can log in using an APN Partner Central account if your business is part of the AWS Partner Network and you have an existing login.

Please select whichever option works for you.

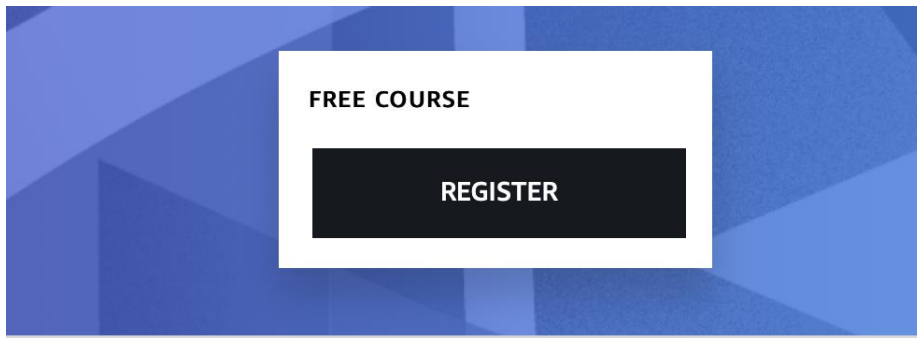

4. Now that your training account is created, you can launch the Cloud Practitioner Essentials course, which maps to the Cloud Practitioner Certification. As part of CloudU, you will complete a few modules of this course each week, based on the program schedule.

Inside your AWS Training account you'll see a 'Learning Library' where you can search for the course, but it may be easier to follow this direct link:

<https://www.aws.training/Details/eLearning?id=60697>

If the site has forgotten you, you may need to hit 'Sign In' again in the top right-hand corner of the page.

5. Once logged in and on the course page, please click 'Register' in a black box in the top right-hand corner.

6. Scroll down, and launch the module you wish to view. Make sure you unblock any popups to allow the content to run.
7. When you take a break from Training, you can resume the course by logging back in to [www.aws.training](https://www.aws.training) and navigating to 'Transcript' under 'My Account' in the top right hand corner.

English ▼ My Account ▼

From here, you'll be able 'Launch' the course from where you left off.
