**How to book your Cloud Practitioner Certification Exam**

Congratulations! You are ready to book your Certification exam.

AWS Certifications are managed on a platform called CertMetrics. You can login via AWS Training, here: https://www.aws.training/certification

Once you've made your way to the CertMetrics platform, you should see a yellow 'Schedule New Exam' button.

Hit this button and scroll down to see all of the AWS Certification options. Cloud Practitioner's exam code is CLF-C01, and it should be listed first.

You'll notice we work with 2 different exam providers: PearsonVue and PSI. They both offer the exact same exam, so you can choose your provider based on which one has a session time and/or location available that suits you best. Click through the process for each one to see and compare possible schedule times before booking.

You can select to have the exam proctored in 2 ways:

1. At a test centre: you will need to physically attend the location you've selected, and use a provided computer to complete the exam.

2. Remotely: you will sign in to a platform at a scheduled time on your own computer from home. You'll be asked to run some system checks, and submit photos of your surroundings to ensure you cannot cheat (this will include needing to have a working space clear of notes or other computers, and no one else in the room).

Select your preferred exam language, country, and time zone, and choose an Exam session from the available options.

Proceed to payment. Enter your card details, or the voucher number supplied to you.

Follow the prompts to complete your booking. Upon confirmation, you will receive further details relevant to your chosen testing location, or remote session.

What to expect from the Cloud Practitioner Certification Exam

The Exam Guide at the following link details everything you need to know about the Cloud Practitioner Certification Exam:

https://d1.awsstatic.com/training-and-certification/docs-cloud-practitioner/AWS-Certified-Cloud-Practitioner_Exam-Guide.pdf

You will have 90 minutes to complete the exam, and will answer approximately 65 multiple choice questions.
